We increase our TP by 23% to €3.7/shr, driven by the rollover of our valuation to YE26 (+10%) and higher FY25-27 EBITDA estimates (+12% on average), mainly driven by stronger-than-expected operating leverage. The equity story remains intact, supported by ongoing digital transformation across industries and rising demand for secure digital identity solutions. While LatAm continues to be the core market (95% of revenues), growth in EMEA and sector diversification beyond banking (particularly in insurance, pensions, fintech) are gaining traction. Despite the strong performance YTD (c.65%), we believe the stock still offers an attractive entry point given its double-digit growth profile and margin expansion potential (to be visible in FY25e results). Our new TP offers a 32% upside (including a 20% liquidity discount). At 7.1x EV/EBITDA 26e, Facephi trades at a discount to the sector's average of 10.7x. We reiterate Buy.

Highlights of 1H25 conference call: Management explained its new guidance for FY24-26e, with +26% CAGR growth in revenues, reaching €11m EBITDA by FY26. Growth will be driven by geographic expansion in EMEA and biometrics adoption in new verticals (such as insurance, pensions and fintech). SaaS continued to grow and represented 85% of 1H25 revenues, supporting scalability and margin improvement (gross margin at 89% in 1H25). On financing, the company expects to refinance its syndicated debt before year-end, as expected. Additionally, while FX volatility remains a risk, the company has implemented USD hedging at EUR/USD 1.14, which should help mitigate currency impacts in the future.

Change in estimates. We reduced our FY25-27e sales estimates by 2% on average following the updated guidance, but this is more than offset by stronger operating leverage, resulting in a 12% average increase in our FY25-27 EBITDA estimates, reflecting strong cost control. Our new sales estimates imply a 23% CAGR over 2024-27, with EBITDA reaching €6.9m in FY25e and €14.2m by FY27e, as management continues to focus on margin expansion. On cash flow, we reduce our net debt estimates, anticipating stronger FCF as EBITDA accelerates, reaching a €1.8m net cash position by FY27e.

At the revenue level, our FY25-26 estimates are broadly in line with the company's guidance. However, at the EBITDA level, our FY25 forecast is slightly below the company's €7.4m target (€0.5m difference), as we take a more conservative stance on potential extraordinary costs given the c.€2m in one-off items booked in FY24. For FY26, our EBITDA estimate is broadly aligned with the company's €11m guidance.

Company overview

Founded in 2012 and headquartered in Alicante, Spain, Facephi is a technology company specialising in digital identity verification, authentication and onboarding solutions. Over the past decade, Facephi has developed a robust portfolio of proprietary biometric technologies designed to enhance security, accessibility and fraud prevention, while ensuring ethical data processing. The company has established itself as a key player within the financial services industry – a sector where it has achieved significant market penetration; it is also actively pursuing a diversification strategy aimed at replicating its success in the financial sector in new markets such as travel and public administration. This strategy positions Facephi well to capture growth opportunities in markets with rising demand for secure digital identity solutions. Beyond its headquarters in Spain, Facephi operates through regional subsidiaries, including EMEA (London, UK), APAC (Seoul, South Korea), and LatAm (Montevideo, Uruguay). Facephi has 233 employees (including 70% technical staff) and generates c.95% of its revenues in LatAm (mainly Argentina, Costa Rica, México and Panamá).

Valuation and key catalysts

Our DCF model includes explicit free cash flow forecasts up to 2032. We use a discount rate (WACC) of 10% for the explicit period and for the terminal value. As for long-term growth rate, we assume 2%. We reach an enterprise value (EV) of €128m, from which we subtract our 2025e Net Debt of €6.3m (excluding convertibles and shareholding loans). We adjust the number of shares with the treasury stock. Last, we adjust a 20% standard liquidity discount, given Facephi's reduced size and trading volume (€46k/day over the past 12 months).

Key catalysts include: i) refinancing of the syndicated debt, expected for the end of 4Q25; ii) results releases, confirming the company's top-line growth and consequent margin improvement potential; and iii) announcements regarding new clients, demonstrating increasing penetration; and iii) strategic partnerships to accelerate growth in regions such as APAC and EMEA.

Recommendation

We base our Buy rating on the following factors: i) Sector tailwinds driven by the digital transformation of businesses and increasing regulatory demand for secure digital identity solutions; ii) strong growth and margin expansion expectations, with 20% CAGR for sales in 2024-28e and an outlook for sustained margin expansion, reaching EBITDA of €10.8m by 2026 (c. 23% EBITDA margin); and iii) valuation, as we see Facephi trading at c.7x EV/EBITDA for 2026 (vs the 11x average for its main peers).

For Entities and Clients in the United Kingdom

JB Capital has exited the U.K. Temporary Permissions Regime ("TPR") with respect to the services we provide in the U.K. The TPR was introduced by the U.K. authorities to enable EEA-based firms that were passported into the U.K. pre-Brexit (whilst the U.K. was still part of the EU single market) to continue to benefit from similar passporting and access rights in the U.K. for a temporary period post-Brexit. Upon exiting the TPR, JB Capital has not applied to the U.K. Financial Conduct Authority for authorisation to carry on regulated activities in the U.K. This is because we rely on the Overseas Persons Exemption ("OPE") under the U.K. FSMA Regulated Activities Order 2000 ("RAO"). The OPE allows international firms to operate in the U.K. without FCA authorisation provided they meet certain conditions. To ensure that we are able to benefit from the OPE on an ongoing basis for any potentially U.K.-regulated activities, JB Capital has controls in place to limit our overall U.K. activities and the services that we provide in the U.K.
