ASPY GLOBAL debuted on BME Growth

ASPY, a leading company in the provision of both regulatory compliance and prevention of occupational hazards, celebrated the bell ringing ceremony on 3rd December at the Spanish Stock Exchange Palace in Madrid. The company was listed on BME Growth after raising €35 million through a capital increase transaction with an over demand of 32%. It is the ninth company to list on BME Growth so far this year.

Benefits of being listed on BME Growth, told by its protagonists

The negative impact of the Covid-19 has been felt in all markets but not in the same way. If we look at **BME Growth**, the companies listed on this market have performed better than some of the main European exchange indices during this pandemic year.

"Although investment in BME Growth companies may be temporarily affected, these companies have, in general, high growth expectations and for this reason, the shareholders with a long term profile have confidence in this market" affirmed Pablo Martín, CEO and President of **Izertis**, as one of the reasons of this positive behaviour during Covid-19.

Izertis together with **Soluciones Cuatroochenta**, the financial firm **Renta 4** and Jesús González, Managing Director of **BME Growth**, participated in a webinar on this topic organized by **Estrategias de Inversión**.

BME Growth companies to increase their workforce by 6% in 2020 first semester

In October ended the deadline for **BME Growth** companies to release their audited financials corresponding to the 1S of 2020.

The aggregate financial results released show that, in general terms, the companies listed on **BME Growth** have been able to maintain their sales and increase their workforce in this first semester of 2020 despite the pandemic effects:

- **Sales:** €1,121 M, the same than 1S of 2019.
- **EBITDA:** €352 M, -44% compared to the 1S of 2019.
- **Workforce:** 10,837 employees, +6% compared to the 1S of 2019.

BME to support the Spanish SMEs in the CEPYME 500 initiative

BME participated for the fourth consecutive year, together with Bankinter, Informa and the ICO in the "**CEPYME 2020 Yearbook**", which was presented at the Spanish Exchange Palace.

This Yearbook identifies, selects and promotes the 500 Spanish companies that are leaders in business growth, both for their results and their ability to generate added value, employment, innovation and international projection.

Intercity FC, Dantia Tecnología and Gogo Mobility Robots to incorporate into the acceleration programme Pre-Market Environment (EpM)

The **EpM** programme adds three new companies: **Intercity F.C.**, a football club competing in the 3rd Spanish Division after being consistently promoted year after year; **Gogo Mobility Robots**, a biomedical start-up company dealing in the design, development and commercialisation of robotic systems (Exoskeletons); and **Dantia Tecnología**, a company that provides, among other, Cloud services technology. Furthermore, **IEAF** (Instituto Español de Analistas Financieros) joins as a partner in this training and networking program in which will share its training expertise and its proximity to companies and professional investors.

With these new additions, the **EpM** is made up of 17 companies and 16 partners.
