### Regulation 3. Maintenance of the domestic securities register.

---

- 1.** Securities are considered to be domestic for invoicing purposes, when IBERCLEAR acts as the issuing Central Securities Depository ("CSD").
- 2.** The fee for maintaining the register is set in annual basis points on the cash value of the equity securities registered in the participant's accounts and on the nominal value of fixed income securities.
- 3.** These equity balances are valued using the closing price of the securities at the end of each day. If it is not possible to determine this closing price, the closing price for the previous available trading day is used or, ultimately, the nominal value of the security.
- 4.** When tranches are determined for the maintenance fees, these are applied cumulatively, that is: the balance in the first tranche is subject to the fee for that tranche; the balance in the second tranche is subject to the fee for that tranche; and so on.
- 5.** The registration fee is calculated by summing the balances for all the accounts with the participant's BIC code and applying these to the fee tranches. This involves calculating the average monthly balance for all the participant's accounts, using the balance at the close of each day multiplied by the number of calendar days on which the balance did not change, divided by the total number of days in the current month. This calculation is performed by asset type as defined in the fees, using the result of applying the tranches to this average monthly balance for the participant to calculate the average monthly fee in annual basis points. This average fee is then applied to the balances of each of the participant's accounts. The total for the participant will be the sum of applying the average fee to the average balances of each account for each type of asset.
- 6.** The exchange rate for the last business day of the month, as published on the European Central Bank website, will be used for invoicing issues denominated in currencies other than the euro.
- 7.** When a participant owns over 50% of the shares of one or more other participants, it will have the right to request application of the "Family Concept".

To do this, the maintenance fees for the domestic securities register will be calculated through the aggregation of these participants' balances, applying the average monthly fee resulting from this aggregation to each of them.

The parent will request application by IBERCLEAR of the "Family Concept" for itself and its investees, presenting certification which provides proof of the exact stake it holds in each of them. The parent is required to update this certification each time there is a change in this stake.

If the certification shows evidence of compliance with the participation requirements established above, and it is presented within the first 20 days of the month, the discount will be applied from the first day of the following month. If the certification is presented after the 21st day of the month, the discount will be applied from the first day of the month after that month which immediately follows receipt of the certification.

**8.** The fees applicable for each type of security will be the following:

## Norma 3<sup>a</sup> - Inclusiones y Exclusiones del Registro.

Concepto	Tarifa
Inclusión renta variable	0,4PB

A efectos de determinar la base de cálculo para la aplicación de la presente tarifa, se considerará como valor efectivo total de la emisión aquél que sea el más representativo del valor que es objeto de inscripción.

A título enunciativo y no limitativo, se considerará como valor efectivo total de la emisión lo siguiente: el calculado al precio unitario al que se realice la Oferta Pública de Venta cuando la inscripción se produzca con motivo de la próxima admisión a negociación en un mercado secundario oficial o sistema multilateral de negociación del valor que se inscribe; el calculado al precio unitario de desembolso al que se realice la Oferta Pública de Suscripción del valor que se inscribe; el calculado al importe unitario del contravalor, incluidas primas de emisión, en caso de ampliación de capital de un valor ya inscrito; el valor nominal del capital estatutario máximo en el caso de primera inscripción de sociedades de inversión de capital variable; etc.

En ausencia de un precio de referencia preciso que sirva de base para realizar el cálculo del valor efectivo total de la emisión que es objeto de inscripción, se calculará utilizando como base el cambio medio ponderado que alcance en su primer día de negociación en un mercado secundario oficial o sistema multilateral de negociación.

En aquellos casos en que se produzca diferencia entre el momento de la inscripción y el momento de la determinación del precio que ha de servir de base para el cálculo del valor efectivo, IBERCLEAR podrá dividir la facturación de la tarifa en dos partes, una primera en el momento de la inscripción aplicando la tarifa sobre el valor nominal inscrito, y una segunda tan pronto como se determine el precio de referencia, complementando el importe facturado a cuenta en la primera hasta el que resulte finalmente de aplicar la tarifa sobre el valor efectivo que corresponda.

Las Sociedades de Inversión de Capital Variable, los fondos de inversión admitidos en el BME MTF Equity y las instituciones de inversión colectiva (IIC) de inversión libre e IIC de IIC de inversión libre incorporadas al BME MTF Equity quedarán exentas de la aplicación de la presente tarifa.
